

After successful completion of the course, students will be able to:

- CO1.Understandthebasicsofnutritionscienceandits practical applicationsindaytodaylife.
- CO2.Describethe nutritional requirement and challenges of different groups through lifecycle.
- CO 3.Explain the role of proper nutrition during pregnancy and lactation.CO4.Describethe physiological changes which take place through lifecycle
- CO5.Understandthetypesoffoodsafetyhazardsanditsmitigationmeasures.

Unit I: Introduction to nutrition science: Composition of food (carbohydrates, proteins, fats, vitamins, minerals, fiber and water), balanced diet, food groups (The 11 food groups), RDA, factors affecting RDA, determination of RDA of different nutrients, reference man and woman, practical application of RDA, current diet and nutrition scenario, common nutrition problems (Starvation, Protein Energy Malnutrition, Nutritional anaemia).

Unit II: Life span nutrition: Nutritional requirements for adults (reference man and woman), infants, pre-school children, school children, adolescent children. Geriatric nutrition.

Nutrition for expectant and Lactating women: Preconceptual nutrition, physiological changes during pregnancy, nutritional requirements for pregnant women, physiology of lactation, nutritional requirements of a nursing mother.

Unit III: Foodsafetyhazards: Biological hazards (bacteria, molds, parasites), chemical hazards (Food additives, pesticides/agricultural product residues, veterinary drug residues) physical hazards (natural and unnatural), allergic hazards (Milk, egg, nuts, wheat, shellfish), food adulteration hazards (types and mitigation measures).
