Our University has been known for its commitment to teaching, research, conducting academic programmes and examinations as per schedule. We have the Credit Based Semester System at the undergraduate and the Choice Based Credit System at the postgraduate level. The admission of Research Scholars and foreign students for Ph.D. and P.G. programmes on the campus has increased considerably due to several academic and administrative initiatives taken in recent years.

Our teaching faculty have rendered themselves creditably in their teaching and research activities. H-index of the University which was 32 in the year 2013, has reached 55 that clearly shows research progress in the University. The research programmes are strengthened through the Research and Consultancy Promotion Cell. All the teachers and SC/ST research scholars are provided with laptop. The University has introduced several welfare programmes for SC/ST students under SCP-TSP grants sanctioned by the Government. For the first time the University has appointed leading academicians from India and abroad as Adjunct Professors to teach our students.

The basic facilities available on the campus include Administrative building, Faculty Buildings, Library, Students Hostels, Staff Quarters, Guest Houses, Mangala Auditorium, well-equipped outpatient health centre, sports facilities like gymnasium, indoor stadium and play grounds with 400 mtr. track. The University maintains a close liaison with the public of the coastal region and Kodagu through various outreach programmes including University-Industry interaction, extension activities through Prasaranga, NSS and various Endowment Chairs and Study Centres.

The University provides scholarships for meritorious students. There are other endowment scholarships also for the meritorious but poor students. Mangalore University has contributed in developing sports in the state through the affiliated colleges. At the Inter-University level, we have produced more than 100 internationals who have brought laurels to the country by winning medals at different levels. The University has introduced sports scholarships to talented sports persons. Incentives to Inter-University new record creators and incentives to All-India Inter-University medalists are given every year.

We have taken all efforts to develop the P.G. Centre at Chikka Aluvara, Kushalnagara. We have established the First Grade College at Mangalagangothri to cater to the higher educational needs of the local people and also started the Evening College at University College, Mangaluru to help the poor students to continue their studies while working at day time. Our constituent colleges such as University College, Mangaluru and Field Marshal K.M. 15.4 ADVANCED SCIENTIFIC RESEARCH CENTRE, BELAPU

Mangalore University will establish an advanced research centre at Belapu in Udupi District, at an esteemed cost of Rs. 141.8 crores which will cater to the research needs of the region and other researchers at large. The research centre aims at developing technological invocations which will be of use to the society.

Thrust areas of research:

- Conservation and bioprospecting of rare, endangered and threatened (RET) plants of the Western Ghats with an emphasis on medicinal uses of these plants
- To develop measures to eradicate epidemic diseases of this region and also to develop curative and drug delivery systems for these diseases
- To subject modern materials and instruments to nano technology (?)

The antimicrobial activity of the nano materials will be utilised to develop a centralised drug delivery system and to develop nanoinstruments using spectronics. Efforts will be made to develop effective cure for tropical diseases like malaria and also to much neglected diseases like African trypanosomiasis, Chagas, Dengue, Lischmaniasis, Phylarisis and Leprosy.

Additionally, research programmes will be developed to produce useful products like biogas and biofertilizer from solid waste. Also efforts will be made to produce diesel from plastic waste using techniques like D-polymerisation and to produce newer useful chemicals by methods like pyrolysis. These methods, apart from being useful are ecofriendly.

This research centre will focus on the development of the coastal region and will be developed as an advanced research centre.

Govt. Of Karnataka has sanctioned a grant of Rs. 50 crores and has allotted Rs. 16.67 crores in the first year 2017-18 and released an amount of Rs. 4.5 crores. A master plan is being prepared to develop the land allotted to the University for the purpose

1. Introduction

UGC has been assisting the Universities for setting up of computer Centre since 1990 for research, training and in application of computers in every field/subject. Consequently Mangalore University Computer Centre was established in 1990.

Computer Centre plays a key role in today's knowledge driven society. It provides comprehensive Information Communication technology (ICT) services to Academic/Administrative departments of the university. Its key services are providing reliable and available ICT infrastructure comprising of computational services and Internet services. Computer Centre maintains reasonably good ICT environment and augments the same from time to time as and when needed. It is also geared up to provide uninterrupted efficient services to the end users.

Cyber Lab is centralized computational facility comprising of 32 desktop system and related system of application software.

It is very important to be connected to the Internet in today's 'Information Era', Mangalore University making available internet services through two independent Internet service providers (ISPs). One is through NKN which high speed connection of up to 1 Gbps and the other through 10 Mbps leased line from BSNL. Entire campus is configured as a set of Virtual Local area networks (VLAN). The connectivity within the department is extended through CAT5/.CAT6 UTP cabling, while connectivity across building is established through OFC backbone. Core switch at the Computer Centre provides high speed switching required across the campus network. The switch in the Department/Office/Building is used to provide wired connectivity to class rooms / faculty rooms / Labs etc. The internet access is made available to all users through wired Ethernet outlets and Campus wide Wi-Fi (Wireless) facility.

2.0.Major contribution to Departments/College

A. Operation and Maintenance

1. Extended Central Annual Maintenance Service for a period of monthly maintenance basis, on pro-rate basis at the rate of Rs 63, 333/- per month.
2. Co-ordination for Annual Maintenance Contract for networking items in the campus at a cost of **Rs 4, 80,259=00.**
3. Co-ordinated the procurement of purchase of toner Cartridges for Laser and Inkjet under rate contract purchase. 186 cartridges worth **Rs. 5, 28,290/-** were purchased for the year under report.
4. Maintenance of in-house mail server – **mail.mangaloreuniversity.ac.in.**
5. Extended use of Internet services by providing **58 LAN I/O points** to the following departments/offices at total cost of **Rs. 2,01,982/-**, under rate contract scheme.

3. Facilities

3.1. Computational Facilities

Computer Centre houses mail server and web server, to provide ICT services. These servers are connected to clients in cyber lab and other PG Departments/offices/centres. Campus network on OFC interconnects all computers systems in one logical network facilitating services to be utilized from any server on the network. The overall campus network diagram is as shown in Fig.1. Central servers and network services are available round the clock on 24x7 basis.

3.2. Cyber Lab Facility

Cyber lab is the facility made available to all users. It houses 27 desktop systems with internet connectivity. It also has adequate peripherals such as printers, scanners. Cyber lab is operational from 9.00 AM to 7.00 PM on all working days. Cyber lab utilisation for the year under report is shown in Fig 2

3.3. E-mail Facility

Computer Centre hosts in-house mail server with domain mail. mangaloreuniversity.ac.in. Web based mail services are available on independent server with open source mailing solution(SME server)

3.4 Internet facility

Internet communication is the lifeline in todays connected digital world. University provides Internet facility through two services providers viz NKN and BSNL. NKN provides full text access to scholarly journals on a 1 Gbps leased line. BSNL provides additional separate 10 Mbps leased line. Gateway level appliance provides firewall services, anti spam, anti-virus intrusion detection and content filtering services. This ensures secure and safe internet experience to all users. Internet access is available at all departments/offices round the clock on 24X7 basis.

3.5 IP Phone facility

The Computer Centre also houses the IPPBX appliance(Cisco be3000) to provide VoIP services through IP phones.

3.6 Wi-Fi Facility

The solution consists of central controller and access points distributed across the campus. The access points conform to the IEEE standard 802.11 ac, which ensures ideal data transferspeed of 1300Mbps. There are 190 indoor access points deployed to give coverage within the buildings on the campus and 10 outdoor access points to give coverage in open spaces outside the buildings.

All the access points are controlled by central WLAN controller. This controller controls major functions of access points such as authentication, encryption, quality of service etc. This also acts as management console to configure the access points by the administrator. We have provided a redundant controller to ensure high availability, in the event of failure of main controller.

Security is the major concern in Wi-Fi usage. We have ensured adequate security – both for connectivity to Wi-Fi network and to the data transferred over the air. The user is allowed to access only through the registered mobile device, where MAC id of the device shall be the identifying feature. Additionally user has to authenticate using the user name and password assigned to him.

4. Services

The Computer Centre extends its services in the following areas:

- Software Development and / Implementation
- Technical Consultancy Services for Hardware, Software procurement and deployment
- Computer Training Programs as and when needed
- Data Processing
 - Major Services extended include
 - ❖ AMC services for computers and peripherals on the campus(Fig 3)
 - ❖ Procurement of purchase of toner cartridges for laser and Inkjet printers(Rate Contract)
 - ❖ AMC services for networking devices and IPPBX appliance
 - ❖ Providing network related services on rate contract basis
 - ❖ Providing internet services from two independent service providers
 - ❖ Operation and maintenance of cyber lab.
 - ❖ Providing Wi-Fi Campus Networking.

25. CENTRE FOR ADVANCED RESEARCH IN ENVIRONMENTAL RADIOACTIVITY (CARER)

COORDINATOR : PROF. KARUNAKARA. N

1. Dedication of the CARER to the Nation

The Centre for Advanced Research in Environmental Radioactivity (CARER) has been established by the Mangalore University as a NATIONAL FACILITY through the financial support from the Board of Research in Nuclear Sciences (BRNS), Department of Atomic Energy, Govt. of India, and technical support from the Bhabha Atomic Research Centre (BARC). This is the most advanced laboratory/center for radioecological and radiation protection research in the country. The centre is engaged in frontline research on radioecology and environmental radioactivity in collaboration with BRNS, BARC, Indira Gandhi Centre for Atomic Research (IGCAR), and Nuclear Power Corporation of India Ltd. (NPCIL). The highlights of the centre are:

- ✓ Accredited by the Atomic Energy Regulatory Board (AERB)
- ✓ Infrastructure facility of international standard
- ✓ MoUs with BRNS, BARC, & NPCIL
- ✓ Capability to measure radionuclides of interest in the entire nuclear fuel cycle.
- ✓ Collaboration with national and international laboratories
- ✓ 82 publications in international journals
- ✓ 8 major research projects on radioecology are successfully completed – total funding received ~ 9 crore.
- ✓ Consultancy projects ~ 1.2 crore
- ✓ Users from nearly 30 different institutions of the country

The centre will serve to the research needs of various research groups from national laboratories/institutions/universities of the country. Besides, the facilities of the centre will help in teaching programmes of the University by training the post graduate students in radiation physics related areas.

Highlights of the On-going BRNS Coordinated Research Project (BRNS-CRP)

The centre has been established through a BRNS project sanctioned in the year 2014 titled “Standardization

of techniques for ^{14}C and ^3H measurements in environmental matrices and evaluation of population doses in the vicinity of PHWR power plant” to CARER with a funding of nearly Rs. 6 crores. This research project involves a systematic effort on the measurement of ^{14}C and ^3H in the environmental matrices around PHWR plants in India.

The Mandate of the Centre

- To conduct advanced research studies in environmental radioactivity, radiation protection, and radioecology of national importance,

- To collaborate with other institutions and evolve regional coordinated research projects on radioecology and radiation protection, which are of interest to BRNS, DAE, BARC, and NPCIL and ensure generation of quality data from all project partners,
- To extend advanced facilities to the teaching programmes of Mangalore University and other institutions,
- To focus on generating trained human resources in areas of low level radioactivity measurements and radiation protection through frequent training programmes and vacation courses,
- To help the industries of the southern region by testing of commodities and issue necessary certificates, and
- To evolve as an international facility for research in radioecology and environmental radioactivity.

Areas of Research

- Standardization of techniques for ^{14}C and ^3H measurements in environmental matrices and evaluation of population doses in the vicinity of the PHWR power plant,
- Studies on transfer factors and transfer coefficients for radioactive and non- radioactive elements in the environment with emphasis on transfer to food chain around the nuclear facilities and mining regions,
- Baseline studies around proposed nuclear facilities and mining regions,
- Radioecological impact assessment studies around nuclear and thermal power plants,
- Neutron activation analyses of environmental matrices,
- Development of new techniques for radon/thoron measurements and mitigation,
- Use of radionuclides to study the environmental– application of ^{137}Cs , ^7Be , ^{210}Pb , and ^{210}Po as tracers and chronometer, and
- Uranium and Thorium series disequilibrium studies.

Facilities Available in the Center

CARER has 6 laboratories with state-of-the-art facilities for radioecological studies. These facilities are being extended for researchers from national and international laboratories, universities and institutions, and industries:

- Liquid scintillation spectrometry
- Carbon-14 and Tritium measurements laboratory
- Alpha spectrometry laboratory
- Gamma spectrometry laboratory
- Radon laboratory
- Sample processing laboratory and laboratory
- Laboratory for simulation studies on deposition velocity, deposition rate, and mass interception factors of radionuclides /stable elements.

Support to Other Universities/Institutions/Colleges

BRNS is encouraging many institutions across the country to initiate research programmes on low-level radioactivity measurements regions. Other funding agencies such as

the Department of Science and Technology (DST), University Grants Commission (UGC), Ministry of Earth Sciences (MoES), etc., have also been promoting research studies on radionuclides in the environment, and their applications as tracers, chronometer, etc. The new groups, which have recently initiated these studies, lack adequate infrastructure facilities (both measuring systems and calibration facilities) and expertise. In order to generate quality data, which can meet any stringent quality assurance programme, advanced equipment, calibration facility, and expertise are essential.

CARER is helping researchers from other institutions of the country by extending the advanced facilities to them. During the last couple of years, users from other institutions have increased by manifold. Every effort is made to accommodate the requests of all the researchers from different parts of the country.

Support to the Industries

CARER is accredited by AERB for the measurement of radioactivity in commodities and issuing certificates as per the regulations of BIS, Govt. of India. Many industries from all over India approach CARER for testing of materials such as, spices, packaged water, pharmaceuticals, food materials, etc. meant for export as well as for public consumption. Besides this, many other industries such as, thermal power plants, mining industries, metal industries, etc. are using the facilities of CARER for testing their products for radioactivity. Availability of testing facilities at CARER has immensely benefited the industries of this region.

It is a matter of pride to mention that CARER is the first AERB accredited laboratory in the University system in India, which can undertake testing for radioactivity and issue certification for packaged water, food, commodities, etc.

Extension Activities

CARER is actively engaged in educating and creating awareness among the general public, college teachers, and students about the radiation in the environment, the beneficial applications of radiation and radiation technology, and of the importance of nuclear power for the development of the country. In this direction, CARER is frequently organizing public awareness programmes in association with different colleges and institutions.

Training Programmes for Researchers

Training programmes and workshops are organised periodically by CARER for students, research scholars, faculty, project staff of BRNS funded research projects, and for participants from industries. The participants are trained in environmental samples collection, sample preparation, and low level detection using advanced facilities.

The centre was dedicated to the Nation by Shri. K. N. Vyas, Director, Bhabha Atomic Research Centre (BARC), Trombay, Mumbai on June 10, 2016. Dr. K. S. Pradeep Kumar, Associate Director, HS&EG Group, BARC, released the information booklet on CARER and Prof. K. Siddappa, Former Vice Chancellor, Bangalore University & Former Director, Microtron Centre, Mangalore University unveiled the CARER logo. Prof. K. Byrappa, Hon'ble Vice Chancellor, Mangalore University presided over the function.

II. Workshops:

- a. In order to promote gender equality, guaranteed by Article 15 of the Indian Constitution, we need to change the mode of interaction at all levels – home, school, workplace and so on. To create an environment that fosters equal treatment, Government of India envisages the engagement of Gender Champions in all schools and colleges across the country. Gender Champions can be both boys and girls above 16 years of age enrolled in educational institutions. This is a joint initiative of the Ministry of Women and Child Development and Ministry of Human Resource Development.

Gender Champions are envisaged as responsible leaders who will facilitate an enabling environment where girls are treated with dignity and respect. They will strengthen the potential of young girls and boys to advocate for gender equality and monitor progress towards gender justice.

To equip and empower the Gender Champions, a formal training programme needs to be given to them. This needs to include IEC material pertaining to information about gender stereotypes, various forms of gender based discrimination, gender equity and equality, legislations, life skills etc. Training programmes need to be organized by the schools/colleges with inputs from experts. The method of training also need to be participatory and interactive to enable the Gender Champions further sensitize students, peer group in schools/colleges and family members on gender issues.

For this, University and Colleges need to identify students willing to be Gender Champions in their respective Colleges. Once the students are selected, they will be given a training for three days. There would be a nodal teacher identified in each College who will oversee the activities of the Gender Champions. This nodal teacher could be the co-ordinators of Womens' Cells in each Colleges.

As a first step in this process, it is envisaged that these Womens' Cells Co-ordinators would be given a Trainers Training and they in turn would train students in their respective Colleges to be Gender Champions.

Since training is an integral part of producing Gender Champions in Colleges, it is necessary that a training manual be produced which will be used by trainers when they train students. Such a manual would make the training more sustainable and standardised.

As a first step toward this, two one day workshops were held for, academicians and members of NGO's on 7th January and 10th March 2017 to decide and finalise the training modules and the methodology.

Objectives of the workshop were :

1. To decide on the content of Training.
2. To decide on the Methodology of Training.
3. To decide on the Modules in the Manual.
4. To assign work on writing of the modules.
5. To scrutinise the written modules

Participants at the workshop being actively involved in discussing the Manual.

- b. In keeping with our commitment to reach out to rural students in our affiliated colleges, the Centre for Women's Studies organized a Gender Sensitization Workshop for students of Laxmi Soma Bangera, Govt. First Grade College, Kota Padukere, in association with DEEDS, Mangalore on 06.02.2017. A total of 64 students both boys and girls participated very actively in the workshop. Subjects such as Sex, Gender, Socialization of boys and girls, Role structures in society, and laws governing girls and women were beautifully dealt by Ms. Merlyn Martis and Dr. Shobhadevi. M.G. There was a very active involvement of the students in the workshop.
