

## MANGALORE UNIVERSITY

### REGULATIONS GOVERNING CERTIFICATE AND DIPLOMA PROGRAMMES IN GOODS AND SERVICES TAX

(Framed under Section 44 (1)(c) of the KSU Act 2000)

#### **PREAMBLE:**

Indian economy is getting more and more globalized, a member of free trade agreements have been signed. These facilitate to allow imports in to India duty free or at low duties. Hence, there is need to have a nation-wide simple and transparent system of taxation to enable the Indian industry to compete not only internationally, but also in the domestic market. Integration of various central and state taxes into a Goods and Services Tax(GST) system would make it possible to give full credit for inputs taxes collected. GST being a destination based consumption tax based on VAT principles, would also greatly help in removing economic distortions caused by earlier complex tax structure and GST is in the development of a common national market.

The Constitution of India has recognized various authorities for making laws to levy of taxes. In accordance, with the Constitution of India, Union Government, State Government, Union territories and local authorities were conferred their powers to levy taxes. Accordingly, each authority has levied different rates and collected various taxes. Chaos and confusions were prevailed with the system of indirect taxes, like too many taxes, cumbersome procedures and formalities and improper understanding and implementation of value added tax systems (VAT). Leading to piecemeal and fragmented and cascading negative impact on the tax payers. For solution to all these problems and integrated GST on national basis came in to effect in the year 2017.

#### **GST : ONE NATION, ONE TAX AND ONE MARKET Philosophy:**

GST is one of the indirect taxes for the whole nation, which is makes India, one unified common market. It is a single tax on the supply of goods and services, right from the manufacturers to the consumers. GST is the biggest tax reforms implemented in the country and GST council meetings to finalize its rate structures both in Goods and Services. Combining several state and central taxes into a single tax has helped to overcome the issue of double taxation and led to the establishment of a common national market with more transparency efficiency and compliance. GST is eliminating the cascading effect of taxes and thereby reducing the price of goods and services. The Goods and Services Tax Act was passed in the parliament on 29<sup>th</sup> March 2017 and came in to effect on 1<sup>st</sup> July 2017. The GST rates are same across the country. The state level tax arbitrages for a consumer are gone. This has reduced incidences of tax evasion which occur due to consumers buying goods and services from the states other than where they reside. GST is levied on the supply of goods and services. GST registration, GST invoicing and filling of overall goods and services procedures has open up more and more job opportunities and GST consultancy facilities to young educated youths.

GST gives a major boost to “Make in India”, initiative of the union by making goods and services produced in India, that leads to competitive in the national as well as international markets. This will leads to India becoming a manufacturing hub and of generate employment opportunities to Indian educated youths. It boost more investment, more exports and employment opportunities to youths.
