DEPARTMENT OF CHEMISTRY M. SC. ORGANIC CHEMISTRY

OC P 558: ORGANIC CHEMISTRY PRACTICALS-VII

COURSE OUTCOME:

- The students will understand the separation of components from mixture of organic compounds by fractional crystallization, fractional distillation, adsorption, paper, TLC and column chromatography, purification and characterization of organic compounds.
- The students learn the determination of pKa values, molar extinction coefficients, keto-enol equilibrium, order of reactions, salt effect and effect of acidity on reaction rates.
- To know the preparation and estimation of aryloxy acetic acids, anilinoacetic acids, estimation of carbohydrates and proteins.
- To understand the elucidation of structure of organic compounds using UV, IR, NMR and mass spectra, locating the organic compounds by reference to literature, use of computers in the study of conformation and geometry of simple organic molecules, utility of chemdraw and chemsketch.

Separation of components from mixture of organic compounds by fractional crystallization, fractional distillation, adsorption, Paper, TLC and column chromatography. The purification and characterization of organic compounds.

Determination of pKa values, molar extinction coefficients, keto-enol equilibrium, order of reactions-SN1 and SN2 reactions, salt effect and effect of acidity on reaction rates.

Preparation and Estimation of aryloxyacetic acids, anilinoacetic acids, Carbohydrates, Proteins.

Elucidation of structure of organic compounds using UV, IR, NMR and Mass spectra.

Locating an organic compound by reference to literature (Chemical Abstract).

Applications of computers in the study of conformation and geometry of some simple organic molecules. Utility of Chem draw and Chem sketch.
