

**MANGALORE UNIVERSITY**  
**DEPARTMENT OF BIOSCIENCES**  
**M.Sc. ENVIRONMENTAL SCIENCE**

**ESH501 ENVIRONMENTAL BIOLOGY**

**52 hrs**

**Course Outcomes:**

CO1 Gain the knowledge of ecosystems and population ecology.

CO2 Study various environmental factors in detail.

CO3 Understand various terminologies in ecology.

CO4 Learn atmospheric humidity in detail.

**UNIT I (13 hours)**

Ecosystems: Structure, functions, biotic and abiotic components, food chain, types of food chain, food web, Diversity Stability rule, Homeostasis. Ecological niche, Spatial, Functional, Ecological Dominance. Energy flow in ecosystem, Lindeman model Ecotone & Edge effect, Ecological Pyramids.

**UNIT II (13 hours)**

Environmental factors: Limiting factors, Ecotone & Edge effect - climatic factors, influence of light on morphology and physiology of plants, characteristics of heliophytes and sciophytes, temperature – thermo periodicity, effect of low and high temperature on plants and animals.

**UNIT III (13 hours)**

Atmospheric humidity: Relative humidity in relation to metabolism of organism with suitable examples. Wind - mechanical effects of wind; lodging, breakage, deformation, anemophily and anemochory, physiological effects of wind. Edaphic factor - soil complex - soil erosion and soil conservation.

**UNIT IV (13 hours)**

Population ecology: Characteristics, population density, natality, mortality, age distribution, population growth, causes for population explosion, population control. Biological interactions- Interspecies and interspecies interactions, types of interspecific interaction - neutralism, positive interactions - negative interactions, both positive and negative interactions - Amensalism, mutualism, commensalism, parasitism and predation.
