CBH 407

## I Semester M.Com. (IB) Degree Examination, Dec. 2018

(Choice Based Credit System) COMMERCE
International Business
Quantitative Techniques
Time: 3 Hours

## SECTION - A

Answer any four sub-questions of the following. Each sub-question carries

## 10 marks.

1. Present the following data by means of sub-divided Bar-Diagram.

| Year | Boys | Girls | Total |
| :---: | :---: | :---: | :---: |
| 2007 | 1000 | 100 | 1100 |
| 2008 | 400 | 50 | 450 |
| 2009 | 300 | 30 | 330 |
| 2010 | 200 | 20 | 220 |

2. Calculate :
i) Laspeyres'
ii) Paasche's
iii) Bowley's and
iv) Fisher's Index numbers for following data :

| Items | $\mathbf{2 0 0 5}$ |  | $\mathbf{2 0 0 6}$ |  |
| :---: | :---: | :---: | :---: | :---: |
| A | 10 | 120 | 12 | 156 |
| B | 50 | 700 | 40 | 600 |
| C | 15 | 240 | 25 | 475 |
| D | 12 | 216 | 15 | 240 |

3. Find the total revenue, marginal revenue and average revenue when the demand function is given by $Q=30-4 P+P^{2}$ where $P$ is price and $Q$ is the quantity demanded. Also calculate the marginal revenue when $P=3$.
4. Write the general rules of integration. Using integration, find the area of the triangular region whose sides have equations $y=2 x+1, y=3 x+1$ and $x=4$.
5. In the frequency distribution of 100 families given below : the number of families corresponding to expenditure groups $20-40$ and $60-80$ are missing from the table. However the median is known to be 50. Find out the missing frequencies.

| Expenditure | $0-20$ | $20-40$ | $40-60$ | $60-80$ | $80-100$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| No. of Families | 14 | $?$ | 27 | $?$ | 15 |

6. Solve by Cramer's Rule.
$3 x+3 y-z=11$
$2 x-y+2 z=9$
$4 x+3 y+2 z=25$
7. Discuss various components of a time series. Illustrate your answer with suitable examples.
SECTION - B

Answer any two of the following questions. Each question carries 15 marks.
8. Following data relates to years of service in a factory of seven persons and their monthly income.

| Years of service | 11 | 7 | 9 | 5 | 8 | 6 | 10 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Income monthly <br> in ‘ $\mathbf{0 0 0}$ ' Rs. | 7 | 5 | 3 | 2 | 6 | 4 | 8 |

Obtain two regression equations and also estimate the income of a person of 12 years of service.
9. a) Find the inverse of $\left[\begin{array}{ccc}1 & 1 & 3 \\ 1 & 3 & -3 \\ -2 & -4 & -4\end{array}\right]$, if it exists.
b) Calculate the mean, median and mode for the following data.

| Groups | $5-7$ | $7-9$ | $9-11$ | $11-13$ | $13-15$ | $15-17$ | $17-19$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of Observations | 4 | 7 | 11 | 5 | 3 | 2 | 1 |

10. a) In a beauty context the following are the scores awarded by two judges $A$ and B. Obtain the Spearman's rank correlation coefficient.

| A | 58 | 35 | 72 | 78 | 52 | 55 | 53 | 56 | 87 | 62 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\mathbf{B}$ | 50 | 60 | 58 | 70 | 70 | 34 | 52 | 75 | 65 | 65 |

b) Explain why standard deviation is considered superior than the mean deviation measures.
