

Workshop on “Tools and software for plagiarism detection in research”

M.Sc. Microbiology programme of Department of Bio-Sciences organized a workshop on “Tools and Software for plagiarism detection in research” in association with DrillBit Softech India Pvt. Ltd. Bangalore on 11.08.2022. A total of 73 participants from different departments attended and benefited from the workshop. The resource person of the programme was Mr. Raghavendra R, Head of Business development from DrillBit Softech India. In the beginning of the workshop, he has given a lecture on the plagiarism, types of plagiarism, plagiarism detection methods. why plagiarism detection is important, and also about the UGC guidelines regarding plagiarism in research. He has well explained about the UGC requirements related to the thesis submission. After the theoretical explanation, he has started with their own plagiarism detection tool “DrillBit”. Practically he has explained about the settings of DrillBit, and step by step process in uploading the document in the tool and getting the plagiarism report. He has also hinted about the challenging factors facing plagiarism detection. At the end of the practical session, time has been given for the queries. The resource person has cleared all the doubts related to the plagiarism and tools in detections.

The convener of the workshop was Dr. Nannu Shafakatullah, Faculty of the M.Sc. Microbiology Programme. The programme was well organized and received very good feedback from the participants.
